# Let Inspiration Take Root

You've seen the exceptional new varieties we have in store for you in 2025, including exciting new genera from Proven Winners like *Begonia rex*, *Cuphea procumbens* and *Dahlia variabilis*. Plus, the groundbreaking flower patterns of Stardiva® Scaevola and Supertunia Tiara™ petunias offer a fresh approach along with a healthy dose of heat tolerance. Now, it's time to discover some creative new sun and shade-loving container recipes featuring these instant classics.

Extensive consumer promotions across all marketing channels will create strong demand in spring 2025 for our Recipes of the Year™ as well as the Annual of the Year™, Supertunia Mini Vista® Yellow petunia, and Caladium of the Year™, Heart to Heart® 'Blushing Bride'. Find container recipes showcasing them all beginning on page 5.

Proven Winners propagators extensively trial and grow the recipes we recommend in our Grower Recipe Guide. Acres of greenhouse space are dedicated to conducting recipe research each year from early spring through fall, as our growers evaluate key traits like flowering performance, compatibility, weather endurance and more. The recipes you'll see on the following pages have been proven to work. Are you ready to try something tried-and-true but also new?

## Easy Order Hanging Basket Kits

**CHOOSE:** Select from the extensive list of kits available from Proven Winners propagators.

**RECEIVE:** Each of the ingredients for the recipes, one tray per variety.

**LABELING:** Each kit includes a matching recipe specific container garden tag designed to increase brand recognition and drive impulse sales.

**EXCLUDED:** Since branded containers are only needed for single small pot production, they will not be sent with kit orders.

# How to Design and Grow Premium Recipes that Sell

Container recipes are popular with home gardeners because they offer instant beauty and color in a convenient take-home package. So how do growers create the combinations customers love, and produce them as efficiently as possible? Here are seven tips from Brian Bourdon, Four Star Greenhouse's Senior Manager of Offsites & Crop Supply Chain, who has created hundreds of our most popular recipes.

## Pair Plants with Similar Vigor

One of the biggest mistakes people make when designing container recipes is not matching plants with comparable vigor ratings. When a high vigor plant like Supertunia Vista® Bubblegum® is paired with plants that are less aggressive, it quickly overtakes the other plants and sets the combination off balance. But when it is grown with other high vigor plants, the recipe grows perfectly together.

We've tested and rated all of our annual plants for vigor using a scale of 1 to 4. Pay close attention to these ratings when designing your own recipes. If you are following one of our named recipes, we've already factored vigor into account.

All three varieties in our **Hula Hoop** recipe are rated at Vigor 3, so you can be confident they will mix evenly in baskets.

Since all three plants in our **Pretty in Pastel** recipe prefer shade in production and have similar vigor, they are a good match for one another.

## Match Cultural Needs

Growers are savvy at pairing plants with similar needs together in production to increase efficiency. The same rule applies when matching up plants in container recipes. Factors to consider include: lighting and shade requirements, moisture, nutrients, growing temperature and heat tolerance. Most annuals will perform well at a pH of 5.8-6.2, so this detail is less critical to examine.

## Stretch the Imagination

Once your top-selling recipes are established, let's think beyond the standard 3-variety thriller-filler-spiller formula and create premium complex container recipes with higher price points. These can be sold in much larger, high quality decorative containers as cash and carry items.

Container recipes are trending larger and more complex as people look to create fewer plantings with higher impact for their decks and porches. Choose an unconventional thriller like a large *Cordyline*, then surround it with coordinating filler and spiller plants to create a dynamic mosaic of color and texture.

Our premium **Remember Me** container recipe for part sun combines lush foliage plants with vibrant blooms. It includes 'Red Sister' cordyline, Solenia® Scarlet begonia, 'Kimberley Queen' fern and Mezoo™ Trailing Red dorotheanthus.

## Follow the Diagram

We provide planting diagrams for all our hanging basket and upright container recipes found in this guide and online. It's important to train your production department to follow these diagrams when transplanting liners into new hanging baskets and upright containers. This will ensure enough liners are used and that they are positioned to achieve the most attractive mix of colors and textures.

Following the planting diagram will ensure the container grows full and balanced.

## Easy Design Formulas

If you're looking for an easy way to combine plants in premium quality hanging baskets and upright containers, the thriller-filler-spiller method continues to be a success. Consumers have come to know and love this formula, too.

There are countless varieties that will work in these types of recipes – the hardest part is narrowing down your choices. Instead of a typical spike or grass, try something different this year and use a salvia, sunflower or *Alocasia* as your thriller for a more premium finished product.

This **Raise the Bar** recipe follows the classic thriller-filler-spiller formula.

## Color Schematics

We all know that color sells. While pink and purple rank consistently as consumers' favorite colors, blue also ranks near the top of that list. Color preferences tend to shift through the seasons. While pastel pink is often sought after for spring recipes, bold magenta pink plays prominently in warm season combinations.

To accommodate the color preferences of a broad array of consumers, we've created container recipes in 15 different color schemes. From pastel to patriotic, vibrant mixes to earth tones and more, you'll find over 1,600 container recipe ideas at [www.provenwinners.com](http://www.provenwinners.com).

Popular pink and purple varieties with a relatively early bloom time make our **Birthday Cake** recipe a hit for Mother's Day sales.

## Classic v. Unconventional Pairings

Your design and production staff surely has a list of favorite container recipes they grow beautifully every year. In addition to the classics, don't be afraid to branch out and try something a little less conventional that might appeal to a new, perhaps younger, audience.

As the popularity of houseplants grows, so do all sorts of plants with fun foliage like ferns, coleus, caladiums and cordylines. Colorful foliage plants are especially useful for shade gardens, and they often require less frequent feeding than flowering plants.

Our premium **Mother Earth** recipe brings tropical flair to shaded porches and patios, especially when grown in large containers where each plant can grow to its fullest potential. It features Heart to Heart® Dawn to Dusk™ caladium, Double Delight® Apple-blossom begonia, Sweet Caroline Sweetheart Mahogany™ sweet potato vine with a Macho Fern.

# 6 Critical Production Tips

Want to produce lush, flower-covered container recipes like those you see in this guide? Lead growers from our propagation facilities share their top tips.

## 1 The Key to Success

Starting with exceptional quality liners is the most important thing you can do to get your container recipes off to a great start. Even if you encounter issues along the way as you produce your crop, they will be far easier to navigate if you start with quality liners. Your propagator will be happy to work with you to determine the best liner size and delivery date to fit your production model.

Starting with robust liners is the key to success in growing premium quality container recipes. Work with your propagator to determine the best liner size to fit your needs.

## 2 Start Your Liners Off Right

Minimizing stress on newly planted liners will avoid complications down the road. As a standard practice, we apply a preventative broad spectrum fungicide drench one week after transplant to all newly transplanted liners. This protects their roots from potential attacks.

## 3 Moderate Your Watering

It is very easy to overwater newly transplanted liners, so take care not to create this unnecessary stress. During the first few weeks after transplant, the root system is still small and does not yet extend down the bottom of the container. At this time, frequent but low volume water applications are required to provide the liners just the right amount of water they need without becoming overly wet.

Drip lines allow maximum control over irrigation, ensuring liners are not over- or under-watered in production.

## 4 Build a Strong Foundation

When your liners are young and are newly transplanted into hanging baskets, focus on developing a strong root system for the plants. Timing is key. We closely monitor the growing temperature, pH and EC of the growing media, and fertility while the plants are becoming established in the container.

## 5 Trimming and Shaping

As the plants are growing, a series of pinches and/or PGR applications are used to shape the plants in the containers. For many plants, we trim around the edges of the containers as needed, prior to spacing uprights and hanging the baskets. PGR rates are listed on our website for all of the plants we offer.

Trimming plants around the edges of the containers before spacing will make it easier to lay them out properly on the floor.

## 6 Feed Those Plants!

Premium quality hanging baskets and upright containers will fly out of inventory, so be sure you are feeding those hungry plants so they reach their full potential. We've developed four primary and four specialty professional fertilizer products that will help minimize and correct pH-related issues in your production greenhouses. We'll help you select the right product for your situation based on your water test results. All of our fertilizers contain minors and 100% EDDHA as the source of iron.

The eight professional fertilizers we offer can be used with every irrigation. The formula you will use is based on your specific water conditions or needs.

# The New 2025 National Recipes

Packed with our top-selling, most distinctive varieties, our National Recipes have been proven in trials to work. We'll take care of driving consumer demand while you watch them fly out of inventory.
